Agenda Item #6: AUDIT - PRESENTATION of the 2008 - 2009 FISCAL YEAR END AUDIT:

Alan Thompson, Thompson, Price, Scott, Adams and Associates presented the 2008 - 2009 Audit with the following Management Letter:

October 30, 2009

To the Board of Commissioners
Columbus County

Dear Commissioners,

In planning and performing our audit of the basic financial statements of Columbus County for the year ended June 30, 2009 we considered the internal control structure in order to determine the extent and nature of our auditing procedures for the purpose of expressing an opinion on the financial statements, and not to provide assurance on the internal control system. However, we noted certain matters we considered important enough for your attention. No opinion is being expressed regarding internal control. Had our procedures been designed to express such an opinion other matters might have been noted.

We noted the following items that should enhance your internal control structure and reporting.

1. The Board should made adequate time for the finance officer/deputy finance officer to perform random checks of the internal control system in the various departments. This would act as a deterrent since no one knows when their office would be checked. It would also enhance reporting and communication between the counties' departments that handle cash. Efforts have been made to implement a policy, but additional efforts should be made.
2. Although the tax department is eventually getting over 99% of all taxes for any given year, the tax collection for the current year is below the state average. The current year's collection percentage decreased from 94.54% last fiscal year to 93.56%.
3. The increasing size (growth) of the water districts and the finances related to them need careful attention going forward. The debt repayment and the operational effectiveness of the internal control in regards to the water districts will need constant attention until the growth stabilizes. Their ability to cash flow is crucial for long term financial stability of the districts.
4. All county departments that handle cash should be monitored at least once a year as part of the county's finance department's role.
5. Interest income should be allocated.
6. All department accounts should be monitored to ensure they stay within the constraints of the approved budget.
7. Additional efforts should be made to update fixed asset listings during the year as opposed to trying to update at the end of the year. This is one of the last areas that we are able to audit, as the information is not available timely for us to review it. If the information is tracked monthly, everything should be available by the end of July or early part of August to test fixed asset information.

We noted a substantial improvement in the financial records of the County for this fiscal year as compared to the prior year.

Our firm is available to meet with you at any time to discuss any item in the audit report. Our firm continues to be impressed with the quality of work performed by the administrative staff of the County.

This report is intended for the information of management and the governing board. However, this is also a matter of public record, and its distribution is not limited.

/s/ Thompson, Price, Scott, Adams and Scott, P.A.

After a brief discussion was conducted, it was the general consensus of the Board to wait until the audit had been approved by the Local Government Commission before it was accepted by the Board.

A roll-call vote was taken with the following results:
